

Policy on security of payment

"I-Retail Lab" SIA

When paying for an order with a Bank card, payment processing (including entering the card number) takes place on a secure page of the processing system that has passed international certification. This means That your confidential data (card details, registration data, etc.) are not received by the online store, their processing is completely protected and no one, including our online store, can get the client's personal and Bank data.

When working with card data, the information security standard developed by the international payment systems Visa and MasterCard — Payment Card Industry Data Security Standard (PCI DSS) is applied, which ensures secure processing of the Holder's Bank card details. The applied data transfer technology guarantees security for transactions with Bank cards by using Secure Sockets Layer (SSL), Verified by Visa, Secure Code, and closed banking networks with the highest degree of protection.

In case of a refund, the funds will be returned to the same card used for making the payment."

Dear customers, we inform You that if you request a refund if you refuse to purchase, the refund is made exclusively to the same Bank card with which the payment was made!
